- Software Quality Assurance
- Web Designing and Web Development

PROJECT EXPERIENCE

- **Website of all branded women clothes with prices:** I have made website on women clothes of different brands that is (j., gulahmed, khaadi etc) having different prices using html5, css and bootstrap. Learn how to work on the frontend that is how to design the home page and other pages of website front pages.

- **Adidas Shoe management:** I have made adidas show management website using assembly language that is MIPS. The system will be going to help customer and administrator in Adidas shoe outlet.

- **Key Performance Indicator Assessment & Evaluation system for Educational Management (FYP):** We design a system using based on key performance indicators, so that the institute can easily identify if the institute is achieving its objective. Identify the strengths and weaknesses in the department/individual working in an organization which could greatly benefit the organization and the individual working or learning. Performance will be measured at the end of every month by evaluators. Results will determine what can be done to improve, what's working, and what can be done to improve areas for other employees. Technologies that we used are PHP, HTML5, CSS, Bootstrap and MYSQL for database.
