Mobile Application Development

TECH **X**CAPE
A division of HRS Network

TechXcape is a leading software development company with a dedicated team for mobile app development. We build robust, fully scalable and secure enterprise grade mobile apps on native iOS, Android and hybrid platforms

Mobile application development is a vertical of software development in which application are built for hand-held devices such as mobile smartphone, tablets PDAs etc.

Mobile Development Process

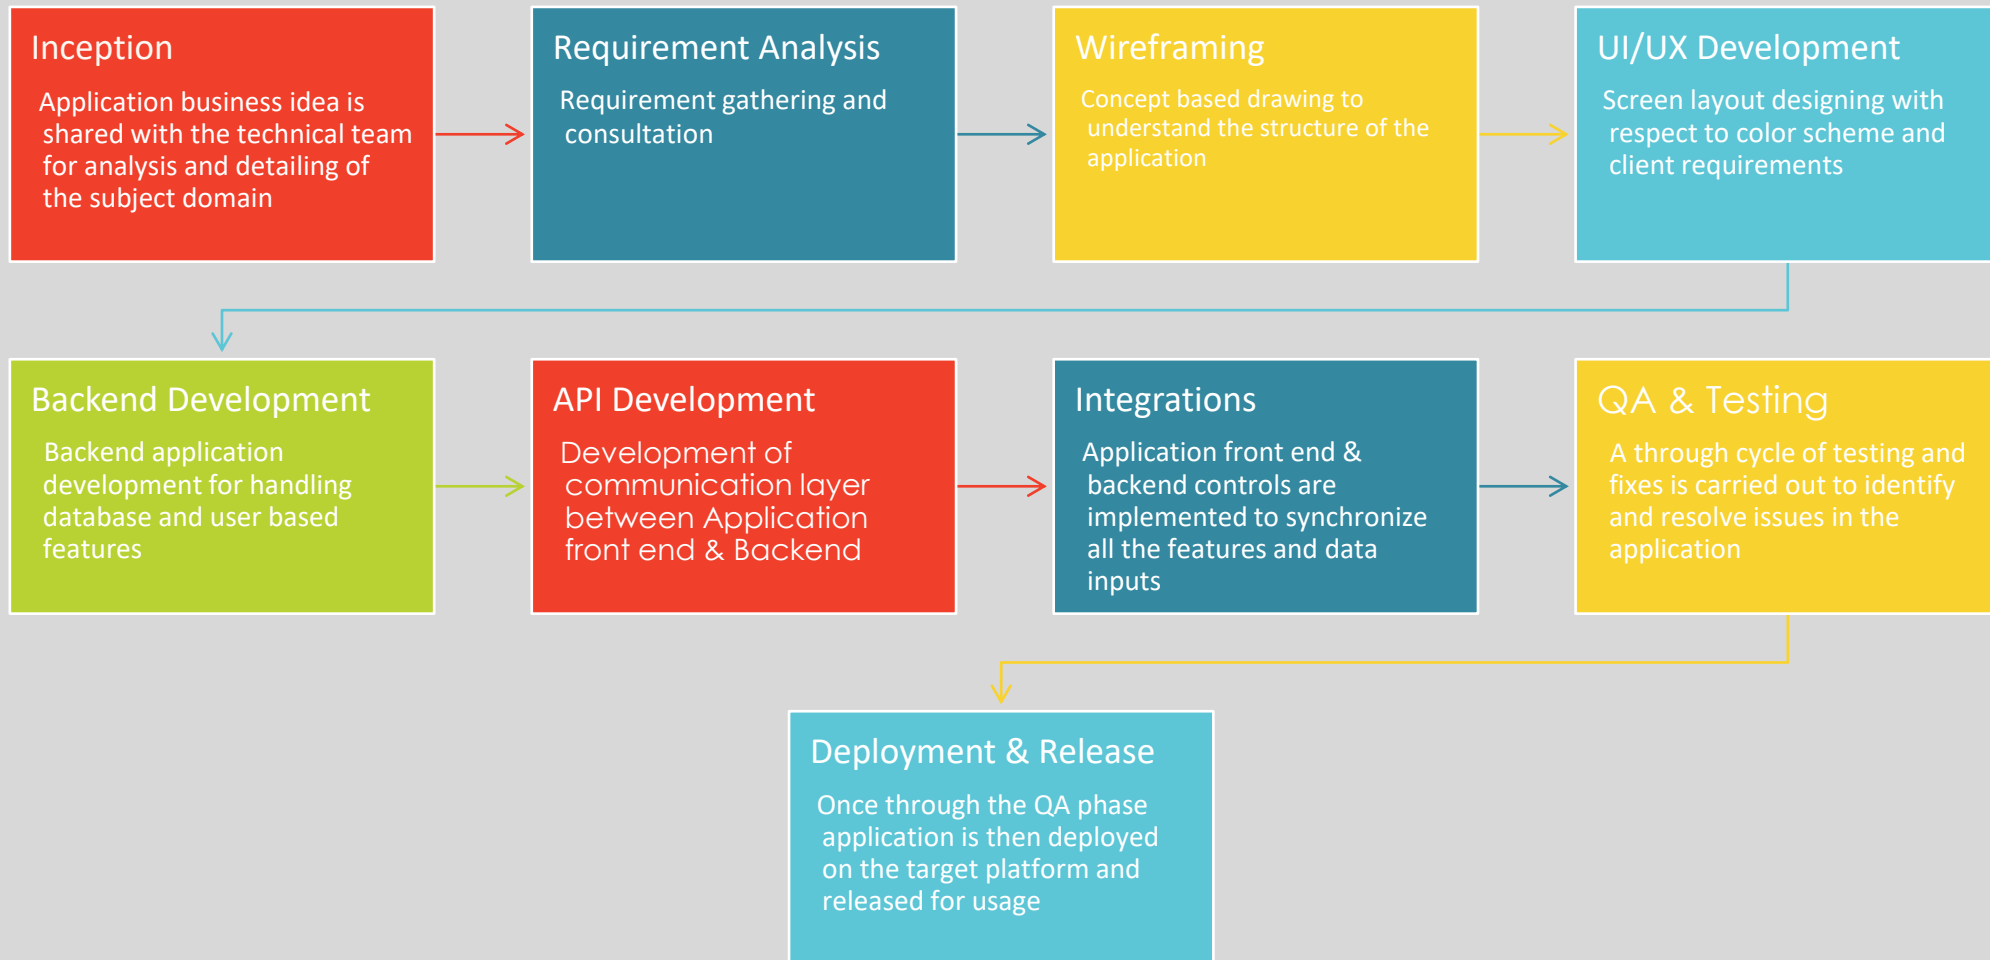

Similar to other software development process, Mobile development has a well defined structure to ensure the output product meets the quality standards and has all the required elements.

The steps includes,

- ✗ **Business Idea Inception**
- ✗ **Requirement gathering and analysis**
- ✗ **Wireframe development**
- ✗ **UI development**
- ✗ **Backend development (Database, and content management)**
- ✗ **API Development**
- ✗ **Integrations**
- ✗ **Quality Assurance**
- ✗ **Product release**

Development Timelines

The development timelines for Mobile applications vary depending upon number of features, the complexity of layouts and platform coverage. A mid-sized application with two variants i.e. Android and iOS would require time as per below details

Sr. No	Stage/Phase	Estimated Time
1	Inception	01 weeks
2	Requirement Analysis	02 Weeks
3	Wireframes	01 Weeks
4	Ui/UX Development	03 Weeks
5	Backend Development	04 Weeks
6	APIs Development	03 Weeks
7	Integrations	02 Weeks
8	QA & Testing	03 Weeks
9	Application release and Deployment	01 Weeks

Mobile Application Development Team

In mobile app development a team of professionals works together to deliver the product, the team needs to have a combination of developers, software testers, Ui/UX Experts and business analysts.

Typically the timelines for any project goes between 8-10 weeks.

Sr. No	Stage/Phase	Estimated Time	Role
1	Inception	01 weeks	Business Analyst
2	Requirement Analysis	02 Weeks	Business Analyst, SQA Engineer
3	Wireframes	01 Weeks	Ui/UX Developer, Business Analyst
4	Ui/UX Development	03 Weeks	Ui/UX Developer
5	Backend Development	04 Weeks	Software Developers
6	APIs Development	03 Weeks	Software Developers
7	Integrations	02 Weeks	Software Developers
8	QA & Testing	03 Weeks	Business Analyst, SQA Engineer
9	Application release and Deployment	01 Weeks	SQA Engineer, Software Developer
